OBJECTIVE

Software Test Engineer with 2 years of experience in designing and executing UI and API automation using Selenium WebDriver, Java, TestNG, Maven, and REST Assured. Seeking to contribute to scalable automation frameworks, CI/CD pipelines, and delivering reliable, high-quality software.

EDUCATION

B.Tech, Computer Science	2019 - 2023
Shri Ram Institute of Technology, Jabalpur M.P.	CGPA: 8.22

SKILLS

Technical Skills	JAVA, Selenium WebDriver, TestNG, Maven, SQL, Hybrid Framework, API Testing(Postman, RestAssured), Automation Framework Design (POM, BDD), Manual & Regression Testing and Defect Tracking
Tools/Software	Azure DevOps, JIRA, Eclipse, Postman, Git/GitHub, Figma
Banking Domain Knowledge	CASA, Credit Cards, Loans (Quick Loan, Home Loan, Personal Loan) Retail Internet and Mobile Banking, Digital Onboarding

EXPERIENCE

Test Engineer	Aug 2023 - Present
Quality Kiosk Technologies	Navi Mumbai, IN
- Performed UI automation testing using Selenium WebDriver and TestNG for web and mobile banking applications (Android/iOS), improving overall testing speed and coverage.%. - Designed and executed 500+ test cases; logged 300+ defects in Azure with 95% closure rate. - Handled API testing with Postman and REST Assured, validating request/response payloads and backend integrations, helping reduce API-related issues. - Worked closely with onsite teams in UAE and offshore teams, clarifying requirements, tracking defects in Azure DevOps, and ensuring on-time release cycles. - Performed backend validation using SQL queries, ensuring data integrity across core banking, card, and fund transfer systems.	

PROJECTS

Retail Mobile and Internet Banking (RIB/RMB):	Sep 2023 - June 2024
- Testing of Retail Mobile Banking application across Android/iOS covering fund transfers, bill payments, card services, and authentication flows. - Prepared and executed detailed test cases including positive and negative scenarios. - Performed backend validations in core banking, card, and fund transfer systems. - Raised defects with evidence, coordinated fixes, and conducted retesting.	
Unified Onboarding Project (UOB):	June 2024 - July 2025
- Testing of digital onboarding journeys for CASA, Credit Cards, Personal Loans, and Mortgages with integrations to backend systems. - Executed 250+ test scenarios covering resident, non-resident, and elite segments. - Validated UAE Pass, AECEB, KYC, employment, and salary verification flows.	

- Tested document upload and e-signature flows for onboarding journeys.

Middleware Infrastructure Update (COLO to OCP Migration):

July 2025 - Sep 2025

- Testing of middleware infra migration from COLO to OCP including APIs and ActiveMQ queues.
- Performed API testing of 17+ applications using Postman, validating payloads and error handling.
- Tested ActiveMQ queues across 19 applications for message publishing and subscription.
- Executed regression testing to ensure zero data/message loss post-migration.

3D Secure Soft Token Project (3DS-Token):

Sep 2025 - Present

- Testing of 3D Secure Soft Token (3DS 2.0) for authentication in digital banking and e-commerce transactions.
- Tested device registration, token generation, push notifications, and fallback OTP scenarios.
- Validated merchant transaction flows and integration with Visa/Mastercard.
- Performed backend validation of authentication server responses.

CERTIFICATIONS

- Programming Essentials in Python from Cisco Netacad.
- Introduction to MySQL from University of Michigan.

ACHIEVEMENTS

- Selected for a one-month onsite opportunity in Dubai to directly collaborate with the UAE client during UAT.
- Recognized as part of the Stellar Team for successful delivery and quality contributions on Retail Internet Banking (RIBRMB) and Unified Onboarding (UOB) projects..
